Project Design Phase-I

Proposed Solution

Date	30 September 2022
Team ID	
Project Name	Plasma Donor Application
Maximum Marks	2 marks

Proposed Solution:-

S.No	Parameter	Description
1.	Problem Statement	People who need plasma are increasing day by day. People who have diseases like multiple myeloma (type of cancer) or plasmacytoma need constant supply of plasma to sustain their life and there is not enough plasma available for them. It is important for the people who are excited to donate, but yet are very busy, to be sure where and when they can donate, and therefore we are designing a system which saves the information of the registered donors and notifies about the current donors and help the users to track down the necessary information about the donors at the time of their need.
2.	Idea/Solution
